Desktop View (above)

Similar to current design. Search bar is made larger to encourage filtering/searching. Quick navigation and pagination are added at the top. Filter by column options are added below column headers. Column sort icons are present and visible at all times.

Table row opened (next page)

Rows drop-down to reveal account information as on current design. Presentation has been adjusted some, with call log button moved next to account name. Close icon added to far right.

Table row opened (alternate view)

This is an alternate way to present the drill-down content of the table. Clicking a row in the table causes a box to slide in from the left. A shadow overlay is added to the table rows in order to direct focus to the content in the box. Box anchors to right edge of table (could also pop up over center).

Mobile view (375px wide)

Search remains large and prominently placed in order to encourage filtering. *Sort by* and *refresh* buttons are combined onto a single line. *Sort by* button features a drop down that allows user to change column to sort by.

Pagination is included at the top in an expanded view, as well as at the bottom as *previous/next* page buttons.

Quick navigation by letter is anchored to the right side of the table.

Table displays only the information chosen as the sorting filter (in this case *name*) in order to reduce clutter.

Mobile view (375px wide) - table row open

Function is similar to current design. Account in table row is clicked on and a drop-down reveals further information broken down into content blocks.

Quick navigation by alphabet is not present when table row is open.

Presentation could change to a pop-up/slide-if alternate desktop option is chosen.
